

An illustration of a volcano with a white and grey body and a red-orange crater, emitting a small plume of grey smoke. The volcano is set against a teal background and is flanked by several green palm trees with brown trunks. Above the volcano is a large, dark brown, cloud-like shape containing text.

NATURAL HAZARDS

“Montserradians sing the life we live.
Montserradians write the life we live.”

We've been exploring the role that cultural responses can play in helping people cope with natural hazards. This exhibit is for Montserrat, and celebrates how the arts and science together can improve our understanding of how to cope and prepare for a natural hazard.

MONTSERRAT

In 1,000 years the island
has experienced at least...

4 VOLCANIC
ERUPTIONS 

12 YEARS
WITH HUGE
EARTHQUAKES

22 HORRENDOUS
HURRICANES

How did they cope? How would you cope?
How can we prepare for the future?
